

HC-400 FUEL CELL

Easily portable and silent in use, the HC-400 fuel cell is a safe, easy-to-use source of power. It has 160 dm³ of internal metal hydride hydrogen storage and is easy to connect to an external fuel supply.

The HC-400 is ideal for all applications where a reliable and portable power source is required.

Technical specification:

- Voltage: 12V DC (24V and 48V DC optional)
- Maximum current: 5A (at 12V DC)
- Weight 5.5 kg including internal fuel storage
- Weight 4.0 kg without internal fuel storage
